9	Air Europa		6	0	6
10	Lufthansa		6	0	6

Why two windows? ANAC's official regulatory window is 00:00–05:59. We also track our own wider **Extended window (23:00–06:59)** because a full night's rest for residents doesn't start and stop exactly at the legal boundary — a loud approach at 23:15 or 06:45 still disturbs sleep, even though it falls outside ANAC's jurisdiction. Extended-window alerts outside 00:00–05:59 are **not** regulatory violations — they're the same noise threshold applied for resident-experience tracking only.

Thresholds (fixed, same as archive.html): ● Red ≥ 98.9 dB (ANAC's absolute night limit) · ☀ Yellow 93.0–95.9 dB (ANAC level 2, exempt 00:00–00:30 and 05:00–06:00). Daytime loud events are reported separately, further below, with no ANAC threshold applied — the regulation only covers night hours.

Methodology update (Sept. 2026): Red/Yellow alerts now use ANAC's fixed regulatory noise thresholds (98.9 dB / 93.0–95.9 dB), consistent across all months and matching the rest of the site. Earlier reports used a per-month dynamic threshold, which produced counts that could not be compared month to month — this report was regenerated with the corrected methodology.
