# Night Alerts – Full Detail

LISBON FINALS · MAY 2026

**Why two windows?** ANAC's official regulatory window is 00:00–05:59. We also track our own wider **Extended window (23:00–06:59)** because a full night's rest for residents doesn't start and stop exactly at the legal boundary — a loud approach at 23:15 or 06:45 still disturbs sleep, even though it falls outside ANAC's jurisdiction. Extended-window alerts outside 00:00–05:59 are **not** regulatory violations — they're the same noise thresholds applied for resident-experience tracking only.

**Thresholds (fixed, same as archive.html):** ● Red ≥ 98.9 dB (ANAC's absolute night limit) · 🌟 Yellow 93.0–95.9 dB (ANAC level 2, exempt 00:00–00:30 and 05:00–06:00) · 🟡 Orange 95.9–98.9 dB. **Orange is not an ANAC-defined tier** — the regulation itself only defines Yellow and Red, with nothing in between. A flight at 97 dB (just 1.9 dB under the absolute ban) used to fall through that gap and vanish from every count. Orange closes it: our own tracking, same spirit as the Extended window, never presented as a legal violation. Daytime loud events are reported separately, further below, with no ANAC threshold applied — the regulation only covers night hours.

**Methodology update (Sept. 2026):** Red/Yellow alerts now use ANAC's fixed regulatory noise thresholds (98.9 dB / 93.0–95.9 dB), consistent across all months and matching the rest of the site. Earlier reports used a per-month dynamic threshold, which produced counts that could not be compared month to month. A second fix (also Sept. 2026): flights between 95.9 dB and 98.9 dB fell into a gap between ANAC's two official tiers and were silently uncounted — a new Orange tier now tracks them (not an ANAC-defined level, see the alerts page for the full explanation). This report was regenerated with the corrected methodology.

⚠ **Hardware note:** Current microphone is technically capped at **100 dB** — actual peak levels may be higher. New calibrated microphone upgrade coming **June 2026**. All values at 99.9 dB should be read as "≥ 99.9 dB".
