Night Violations – Full Detail

● LISBON FINALS · MAY 2026

Scope: this report scores violations against night flights across its own extended tracking window (23:00–06:59) — wider than ANAC's official 00:00–05:59 regulatory window. The ANAC-only breakdown (Red/Yellow violations restricted to 00:00–05:59, same thresholds) is on the previous page. Thresholds are computed dynamically each month — Red = top 10% loudest (≥ 97.7 dB), Yellow = top 25% (≥ 95.1 dB). Daytime loud events are reported separately as informational only.

⚠ **Hardware note:** Current microphone is technically capped at **100 dB** — actual peak levels may be higher. New calibrated microphone upgrade coming **June 2026**. All values at 99.9 dB should be read as "≥ 99.9 dB".
