Night Violations – Full
Detail

LISBON FINALS · JULY 2026

Regulatory scope: Only night flights (23:00–06:59) are subject to noise restrictions at LPPT. Thresholds are computed dynamically each month — Red = top 10% loudest (≥ 98.8 dB), Yellow = top 25% (≥ 96.4 dB). Daytime loud events are reported separately as informational only.

Note vs. June: June 2026 is a transition month — the sound meter was recalibrated on June 22 (previously capped at 100 dB, reading at trigger instead of peak). Month-over-month comparisons against June should be read with caution, especially for peak dB and Red violation counts, which were likely undercounted before the fix. July is the first full month measured with the corrected, uncapped sensor.
